

The American Institute of Architects Continuing Education Systems AIA/CES Registered Provider Program Summary Handout

Provider: NAC Products k086

Length: 1 hour

Program #: 001

Credits: 1 LU hour

Program: Sound Control for hard surface flooring

HSW: Yes

Description: Test methods and materials used for sound proofing hard surface flooring. A description of test methods, acceptable ratings, effectiveness of various materials. A brief presentation on crack isolation and waterproofing products associated with the sound proofing systems.

A/V Needs: Electrical power and screen or clear wall for PowerPoint presentation. The CES facilitator will provide the laptop and projector.

Learning Objectives: After completion of this course, participants will be able to:

- Understand the test ratings commonly used in the construction industry for sound transmission
- Identify various materials currently used as sound abatement products.
- Recognize crack isolation and waterproofing associated with some materials
- Understand installations methods associated with sound abatement mats

Target Audience: Architects, specifiers, interior designers, owners and other design professionals. The ideal audience size can be 5 to 40 people. This program is basic and meets the needs of professionals at every level.

How Taught: The CES facilitator utilizes a PowerPoint or slide presentation to provide an in depth overview for how to specify the appropriate sound abatement, crack isolation and waterproofing material for flooring. The facilitator encourages an interactive session to help reinforce the learning objectives

Facilitator Qualifications: All NAC Products CES facilitators have been trained on CES guidelines and presentation skills. In addition they receive continuous in-depth training in the field and are considered industry experts.

Costs: There is no cost to bring this program into your firm or chapter meeting.
