

ECB® Classic

Anti-Fracture/Crack Isolation Membrane

PRODUCT OVERVIEW

ECB® Classic (Elastomeric Crack Bridging) is the first self-adhering, anti-fracture/crack isolation membrane ever available and is the original fast track solution for sameday tile installation.

ECB Classic is a self-bonding, sheet applied elastomeric membrane consisting of a base layer of polymer modified elastomers permanently laminated to a unique "stress flex" fiber sheet. Together they form a single, high performance, self-bonding membrane designed for use under floor surfaces that require protection from structural movement.

ECB® Classic

ECB Classic substantially reduces reflective cracking and delamination between the substrate and floor surface. Full floor coverage with 36" ECB Classic will provide crack isolation protection for up to 3/8" lateral substrate movement. The peel-and-stick membrane is easily applied with an NAC Primer and as soon as it is positioned, flooring can be installed immediately, minimizing down time and labor cost.

FEATURES & BENEFITS

- Suitable for interior and exterior use
- Protects up to 3/8" lateral movement
- Meets ANSI A118.12 and ANSI A118.10
- Protects from reflective cracking and delamination
- Safely covers asbestos flooring and provides an effective barrier against radon and mold
- Resists MVT up to 10#/1000SF/24HRS when used with NAC TAC and NS97 Primer and 7#/1000SF/24HRS when used with NAC TAC II
- Eliminates need to cut tile to meet control/cold joints
- No need to remove old floors or recess new ones
- Tile can be installed the same day as membrane
- Works with radiant-heat and tile warming systems

INSTALLATION

ECB Classic is recommended for installation under a variety of flooring including, ceramic, porcelain, stone, marble, slate, granite tile, pavers and brick using a thin or medium-bed mortar meeting ANSI A118.4.

Hardwood, manufactured wood, commercial grade vinyl and other finished floors are also acceptable when floated over membrane or installed with a solvent-free adhesive; check with manufacturer.

Ideal for use with radiant heated floors and low voltage tile warming systems.

SUITABLE SUBSTRATES

ECB Classic may be installed over a variety of substrates:

Concrete: Poured, pre-stressed and pre-cast concrete, concrete backerboard, mud beds, gypsum, lightweight concrete, leveling and patching compounds.

Wood: Plywood, APA-rated sheathing, Sturd-I-Floor, hardwood, tongue and groove and OSB with standard face. (Gap between sheathing as required.)

Other Substrates: Existing and structurally sound installations of ceramic or porcelain tile, stone, terrazzo, VCT/VAT, metal, radiant-heated, painted and sealed floors and floors damaged by shrinkage and structural movement. A bond test is recommended.

- For absorptive substrates use Moisture Lock 101 in accordance with manufacturer's instructions.
- A cementitious scratch coat must be applied to concrete block and cured before priming.
- Substrates must be dry, well adhered, and clean of wax, petroleum sealers, dirt, grease, oil or other bond breakers.
- Some concrete boards are not suitable for the application of ECB Classic; check with manufacturer.
- Not recommended for vertical or overhead applications.
- Refer to current TCNA handbook for additional guidelines.

SHORT FORM SPECIFICATIONS

- Material:** Provide ECB Classic Anti-Fracture Membrane as manufactured by:
 NAC Products, Inc.
 3200 S. Main St. Akron, OH 44319
 (800) 633-4622 - www.NACproducts.com
 or an architect approved equal.
 - 40 mil thick load bearing membrane, capable of 3/8" crack isolation protection.
 - Self bonding, pressure sensitive sheet.
 - Compatible with most latex modified thinset mortars, epoxies and adhesives.

Material: Provide NAC TAC, NAC TAC II or NS97 primer (See primer chart below). Full floor coverage of material to be installed in a 36" wide strip application over control/saw cut joints as recommended by manufacturer and in 12" or 24" wide strip applications over cracks.
- Equipment:** Damp mop, industrial vacuum, chalk line, 75-100# roller or flat trowel applying 50 lbs. of pressure/sq. inch, paint roller applicator or brush, utility knife.
- Warranty:** NAC Products, Inc. offers limited and lifetime performance and materials warranties. Please contact customer service at 800.633.4622 or visit NACproducts.com for more information.

TECHNICAL DATA

ECB® Classic Anti-Fracture Membrane

Thickness: 40 mil, ± 5 mil (< 1/16")
Seams: Butt joint application

Roll Sizes & Weights:

1' (305 mm) x 50' (15.24 m) @ 17 lb (7.7 kg)
 2' (610 mm) x 25' (15.24 m) @ 34 lb (15.5 kg)
 3' (915 mm) x 50' (15.24 m) @ 52 lb (22.7 kg)

Shelf Life: 1 year

Freeze Thaw: Stable

Property	Test Value	Test Method
FHA 49001	Pass, 3' Head (914 mm)	ASTM D-583
Crack Resistance	3/8" (9.5 mm)	NAC Model
System Crack Resistance	Rated High Performance	ANSI A118.12
Load Bearing, Bonded Waterproof Membrane	Pass	A118.10
Shear/Bond	Pass	A118.12
Impact Resistance	Pass*	Mil-D-3134J
System Performance	Extra Heavy Duty	ASTM C-627

* Modified for ceramic tile. 2 lb. (.91 kg) ball dropped 8' (2.44 m) on an 8" x 8" (203 mm) porcelain tile bonded to ECB® Classic Anti-Fracture Membrane & Strataflex® Waterproof Membrane.

For full test results, please contact NAC Products, Inc. at 800.633.4622.
